

deaf education through
listening and talking

DELTA believes that with the technology we have today deaf children have the same opportunities and choices they would have had if they had not been deaf.

DELTA believes that being deaf is no barrier to:

- δ Hearing your mother's voice and knowing you are safe and loved
- δ Enjoying and participating in the language and culture that is diverse amongst families and makes them unique
- δ Appreciating and participating in music
- δ Hearing your friends laugh and chat and joining in
- δ Achieving your educational potential
- δ Actively learning in a school setting along with your friends and family
- δ Your career and life choices

How do we know?

Because deaf children and young people whose families have chosen the Natural Aural approach are speaking for themselves about their achievements.
